

21 August 1959

The statement of circumstances made on the attached Survey Report concerning the two (2) DeJur Stenoretts are to the best of my knowledge and belief correct as stated. The units were at one time actually used for their intended purpose. Tapes were exchanged concerning technical details of equipment operation.

21 August 1959

To the best of my knowledge, two (2) DeJur Stenoretts tape recorders were acquired early in the program for the purpose of exchanging tape recordings between field detachments and plant engineering. I understood that one was sent to Detachment A and the other remained in the plant. I attended at least two tape sessions in conference at 29 So. Pasadena Ave., the last on September 22, 1956, at which tapes from Detachment A were played and return comments taped with a DeJur recorder. To the best of my knowledge and belief, the information in the survey report is correct.

21 August 1959

Regarding the disposition of two (2) DeJur Stenoretts, to the best of my knowledge and belief one unit was received at Detachment A during my presence at that location in early 1956. The other unit I personally used at the 29 So. Pasadena Ave. location during the latter part of 1956. I have no recollection of using or seeing either of these units since that time.
